

RYAN LIZZE BROILO

FULL-STACK SOFTWARE ENGINEER

Canoas, Brazil (UTC-3) · Remote · ryanlizzebroilo@gmail.com · +55 54 99671-5190 · linkedin.com/in/ryanlbriilo · github.com/ryanlbriilo

SUMMARY

Full-Stack Software Engineer with hands-on experience building production systems end to end across frontend, backend, databases, integrations, testing, infrastructure and deployment. Strong focus on TypeScript, React, Next.js, Node.js, PostgreSQL and .NET across fintech, SaaS, telecom, identity and AI products. Experienced with payments, authentication, multi-tenancy, CI/CD, Docker and third-party integrations.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Python, SQL · Frontend: React, Next.js, React Native, Vite, Tailwind CSS · Backend: Node.js, NestJS, Fastify, Express, ASP.NET Core · Data: PostgreSQL, Prisma, Supabase, Firebase, Redis, SQLite
Infrastructure & Quality: Docker, Docker Compose, GitHub Actions, CI/CD, Playwright, Vitest, Jest · Security & Identity: JWT/JOSE, WebAuthn, MFA, RBAC, HMAC, SSO · AI: LLM integrations, Claude Code, Cursor, AI-assisted development

EXPERIENCE

Evoris Labs — Co-Founder & Full-Stack Software Engineer | May 2025 - Present · Remote

- Build and evolve production systems across fintech, SaaS, telecom, identity and AI using TypeScript, React, Next.js, Node.js, PostgreSQL and .NET.
- Design and implement APIs, relational data models, authentication flows, payment systems, customer-facing interfaces and third-party integrations.
- Implement multi-tenant architecture, CI/CD pipelines, automated testing and containerized environments with Docker.
- Work on transactional and payment systems involving PIX, signed webhooks, idempotency, financial ledgers, split flows and reconciliation.
- Use Claude Code and Cursor daily for implementation, debugging, tests and documentation, with human review and CI validation before release.

KEM Distribuidora de Alimentos — IT Analyst | Sep 2025 - Apr 2026

- Built internal web applications for checklists, refueling and maintenance, reducing manual rework and improving operational visibility.
- Supported networks, IT infrastructure and Winthor ERP (TOTVS), including integrations, adjustments and environment support.

CAF — Backoffice Analyst | Jun 2022 - Sep 2023 · Remote

- Processed and validated 15,000+ documents per month in a high-volume workflow focused on quality and fraud prevention.
- Contributed to improving the OCR pipeline used by the company's AI; promoted from intern to full-time within four months.

SELECTED ENGINEERING WORK

Adaptare Pay — Fintech/payments platform covering payment orchestration, PIX, split, settlement, ledger, mTLS, signed webhooks, PostgreSQL and Docker.
Evoris ID — Central identity platform using Fastify, PostgreSQL, Redis, WebAuthn, MFA, JOSE, SSO and role-based access.
AdapTare ERP — Enterprise ERP built with .NET/ASP.NET Core and layered architecture for business, fiscal and operational workflows.
OffCard — Transactional SaaS with React, NestJS, Prisma and PostgreSQL; payments, idempotency, S3 storage, Docker, CI and automated tests.
